3. Boot from virtual CD using UltraISO.

File is attached.

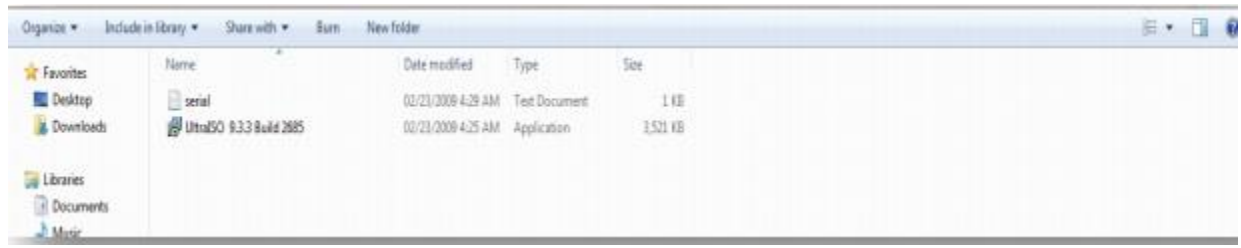

How to Install Ubuntu

In this simple tutorial you will learn how to install Ubuntu inside your windows step by step:

First, you should have Ubuntu_9.ISO & UltraISO.

After that you should install the UltraISO program like that:

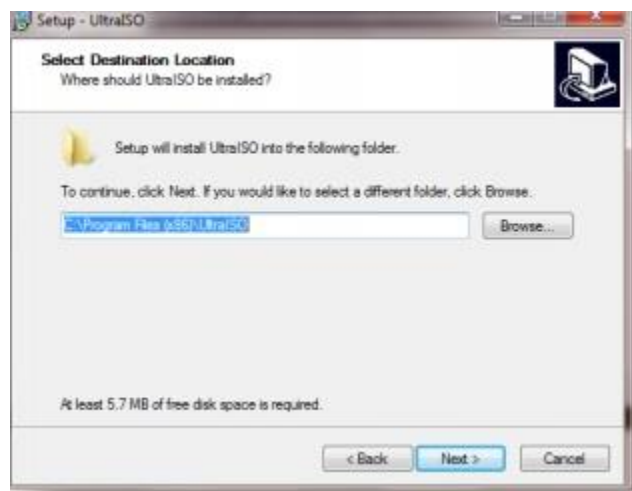

Click on UltraISO 9.3.3 Build 2685

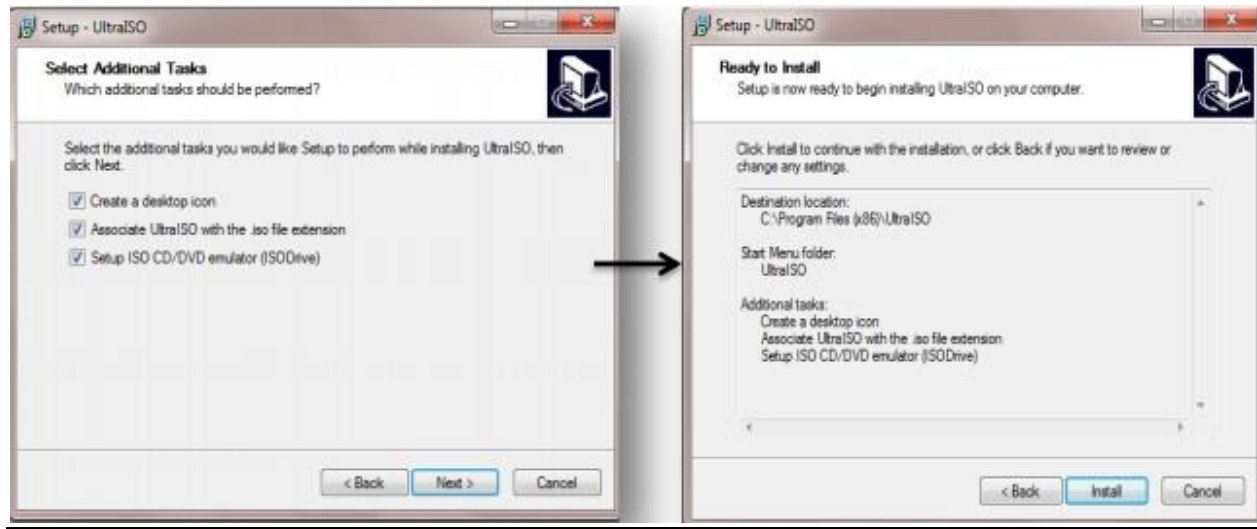

Click Next, then choose I accept the agreement, then Click Next

Click on Next again.

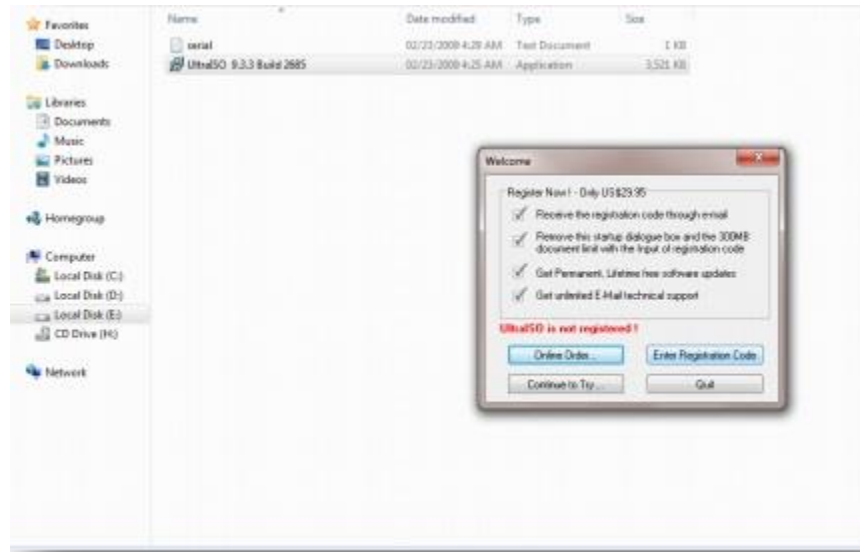

Click on Next → install.

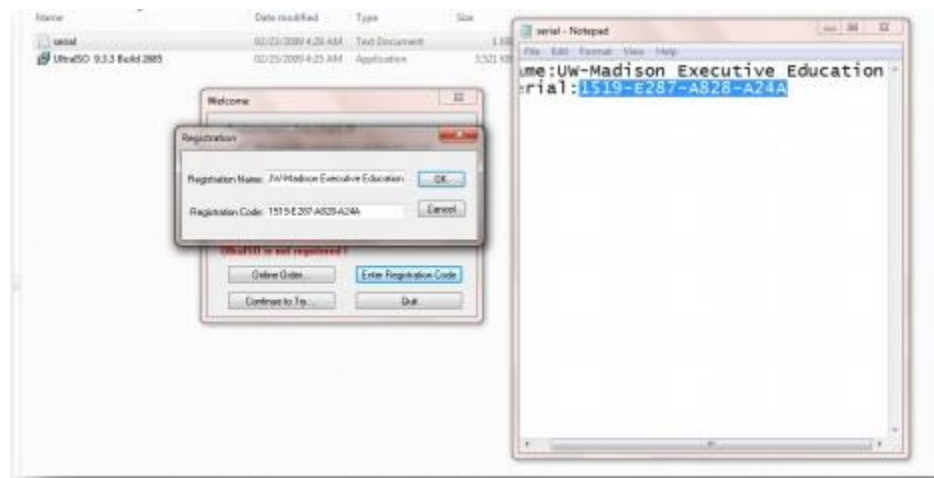

Then Click Finish.

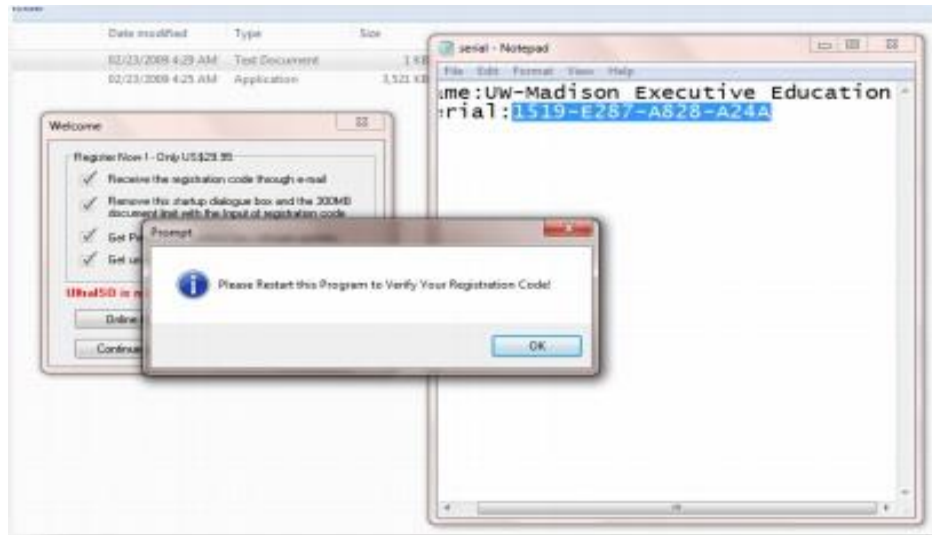

Click on Enter Registration Code

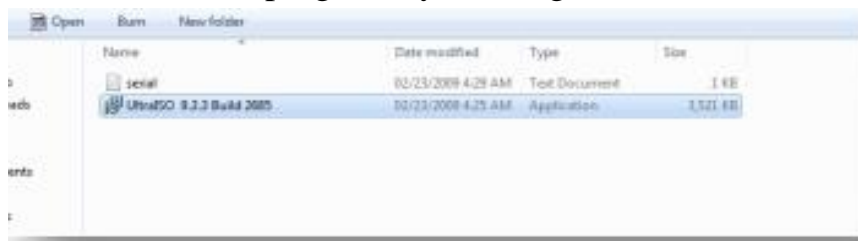

Open Serial text file & Copy and paste the registration Name and Code then click Ok.

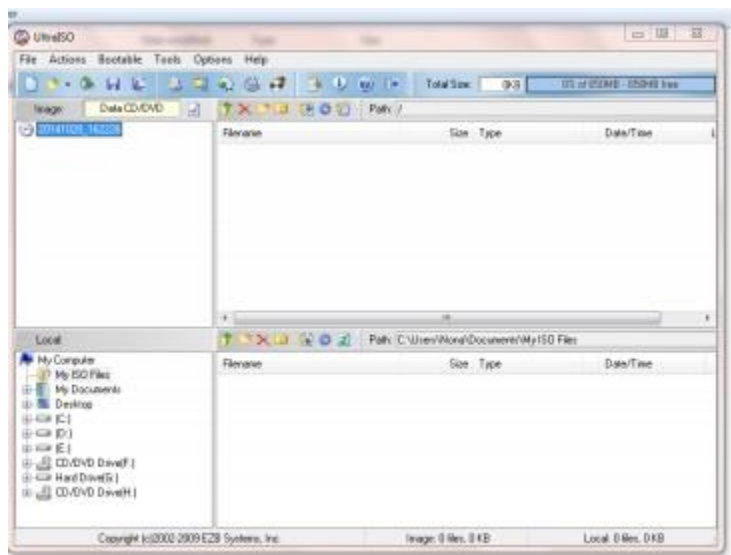

This Message will appear, Click Ok

Now, Restart the program by clicking on UltraISO 9.3.3 Build 2685

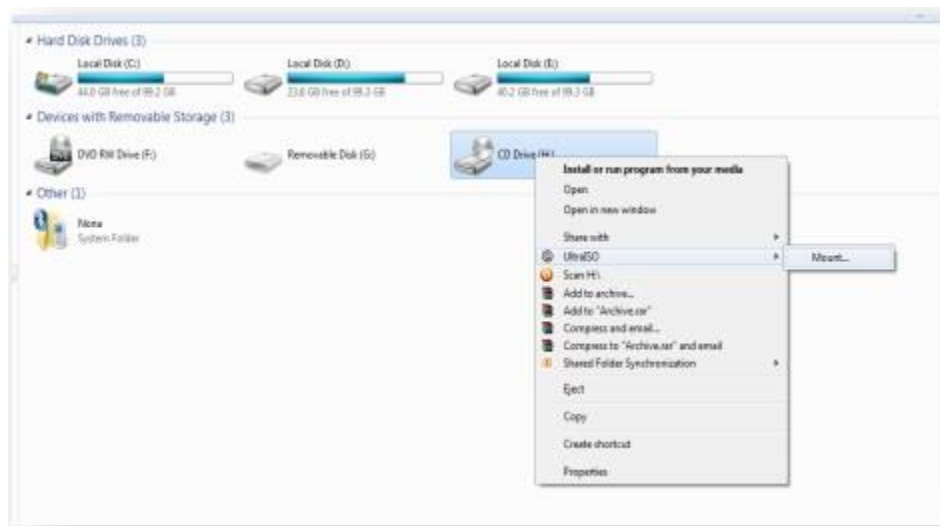

In this step, the program has been Installed successfully.

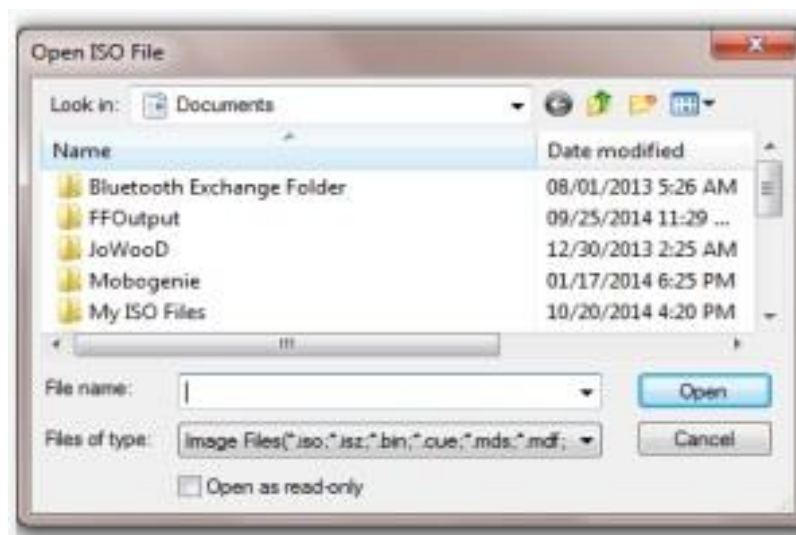

Now Go to my computer.

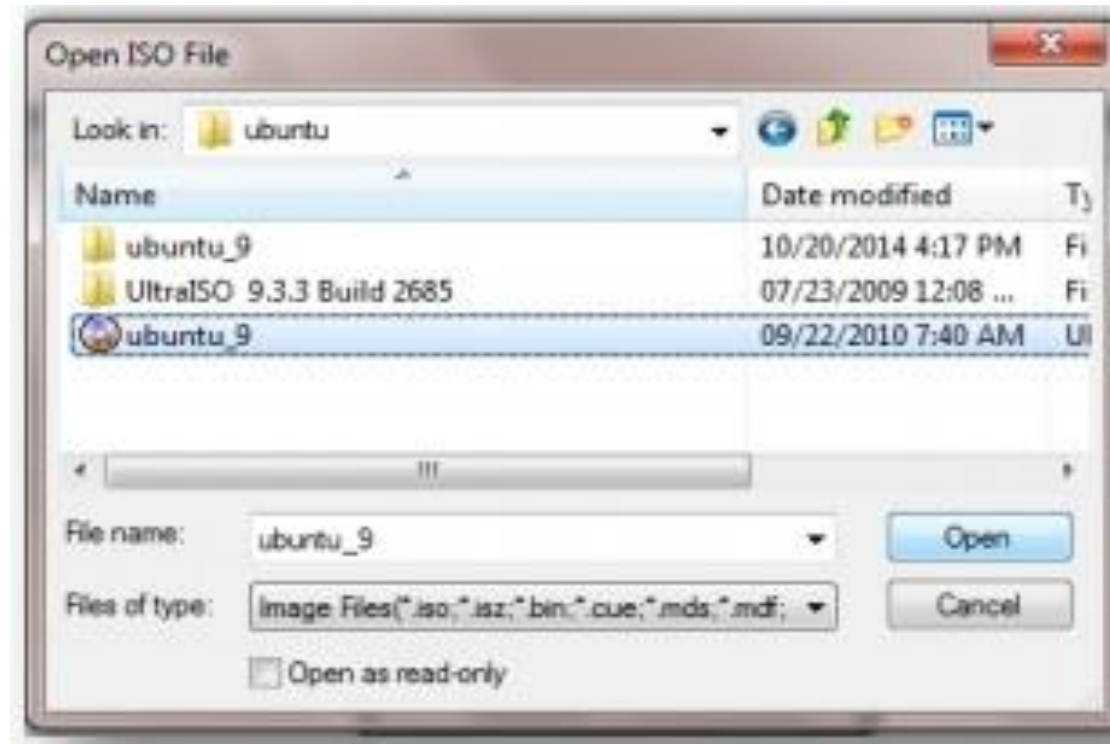

Right click on CD Drive Choose UltraISO → Mount

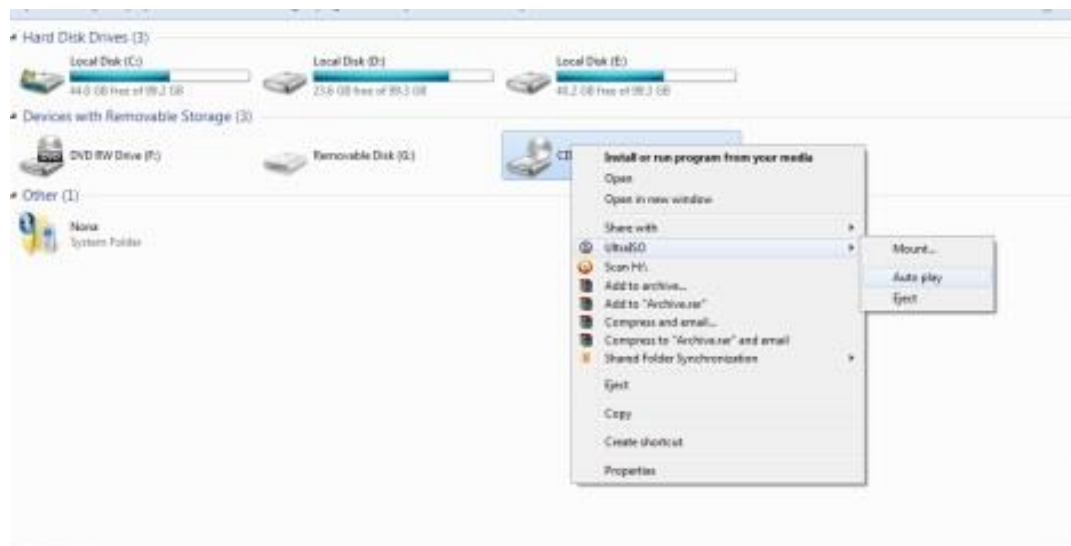

Browse where the Folder Ubuntu_9 Where found.

Choose the cd named Ubuntu_9 Then Click Open

Right Click on CD Drive Again, then Choose UltraISO→ Auto play

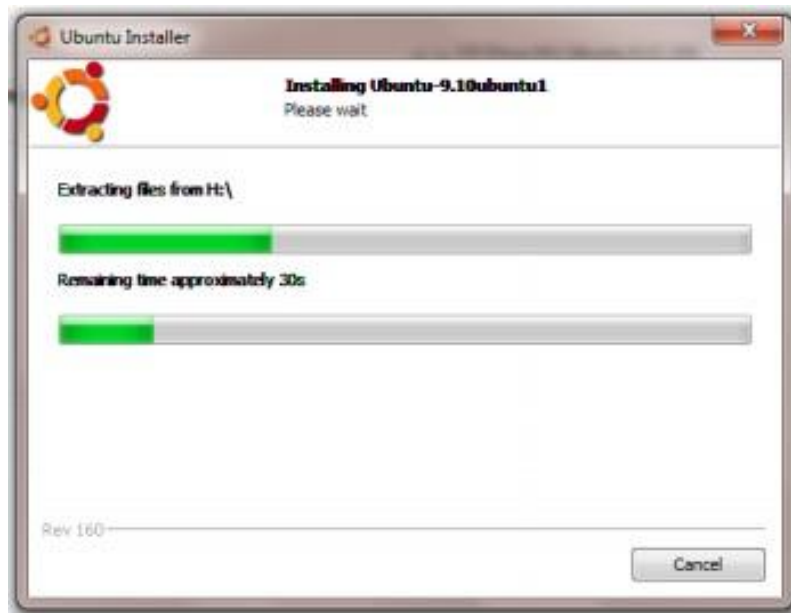

This Window Will appear Click On Install inside Windows.

Then Set your password and Click Install

Wait Until the installation complete.

When the installation completes This window will appear click on Reboot now → Finish

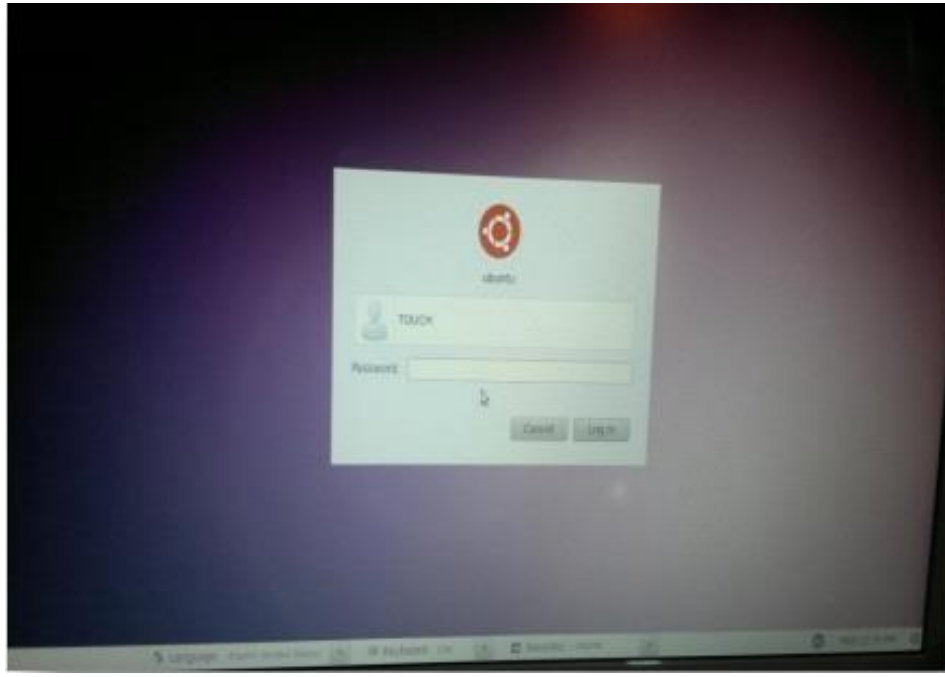

Then Choose the Operating System to Start Ubuntu.

Then Choose the first one.

Type your password.

The Desktop will appear like that, Congratulations.
